

UUSS Green Sanctuary Project Presents

Nathan Kraft **BIODIVERSITY**

What is it? Why is it important?

Nathan Kraft will offer a scientific explanation of biodiversity and how it relates to the interconnectedness of systems and life on Earth. He will provide examples from his research in the Ecuadorian Amazon and in California, including human impacts and implications for conservation.

Nathan Kraft is a Ph.D. candidate in the Department of Integrative Biology at the University of California, Berkeley. He has an MS in Biological Studies from Stanford and an AB in Biology with honors, magna cum laude, from Brown University. Nathan is also an award winning graduate student instructor at UC Berkeley.

Sunday, April 27, 2008, 1:15 p.m.

Unitarian Universalist Society of Sacramento
